EXECUTIVE PROFILE

Target Domains: AI Governance & Responsible AI, AI Risk & Compliance, Technology Risk & Governance

AI Governance professional with 14+ years of experience across Responsible AI, AI governance, program management, transformation and enterprise delivery.

Experienced in translating AI risk principles into governance frameworks, lifecycle controls and evaluation methodologies, with a focus on trustworthy and compliant AI adoption.

Spearheaded Responsible AI initiatives and conceptualized AI Trust Score methodologies integrating safety, fairness, robustness, explainability, privacy and governance metrics.

Proven program management experience across global engineering organizations, driving cross-functional delivery, Agile governance, process improvement and executive reporting, including 25% improvement in delivery predictability and €200K in savings.

Pursuing a Doctorate in Artificial Intelligence & Machine Learning, with research focused on Responsible AI, AI Governance and trustworthy AI systems.

KEY ACHIEVEMENTS

💎 **Trustworthy AI Implementation**
Improve enterprise platform chatbot trustworthiness by 10%
AI Trust score for DMS model of ADAS

💎 **AI Governance Publications & work**
AIDLC Framework - In Progress
AI Governance debt
Responsible AI Platform - to accelerate responsible AI aide to developer community

💎 **Cost Savings**
PMO initiatives delivering approximately €200K in savings
Hybrid PI plannings cross-geo teams

💎 **E-Library for planning Engineers**
Centralised knowledge base for planning activities to improvise time spent

EXPERIENCE

Mercedes Benz Research & Development India

Bengaluru, India

AI Governance Lead

02/2024 - Present

- Spearheaded Responsible AI and AI Governance initiatives to establish trustworthy AI adoption mechanisms across the AI lifecycle.
- Conceptualized and implemented an AI Trust Score to measurably assess AI-system trustworthiness, leading to enhanced Responsible AI practices.
- Developed and piloted an LLM-powered AI risk assessment solution, improving AI model security by 10% in the first quarter.
- Designed reusable AI governance components for model evaluation and compliance, supporting lifecycle decision-making with actionable controls.
- Led a team of 3 and coached junior AI governance specialists, fostering professional growth and enhanced team capabilities.

Mercedes-Benz Research and Development India (Client)

Bengaluru, India

Program Management Specialist

2022 - 2024

- Managed cross-functional engineering programs across technology, operations, and business teams.
- Implemented standardized reporting workflows, enhancing management visibility and reducing reporting time by 25% via process automation.
Executed change management processes in an agile environment, eliminating rework.
- Coordinated 4 Agile teams, 30+ engineers, and 40+ sprints with 90–95% sprint-goal attainment.
- Coordinated PI Planning across 10 Agile teams and 70+ participants.
- Drove process improvements and PMO initiatives delivering approximately €200K in savings.

EXPERIENCE

Collins Aerospace

Bengaluru, India

MD's office - Program Management

11/2019 - 01/2022

- Partnered with senior leadership, business heads and cross-functional stakeholders to govern high-visibility operations, transformation and strategic programs.
- Created exec reports on KPIs, risks, insights for leadership decisions.
- Managed program operations: facilitated reviews, quality talks, issue resolution, and business continuity.
- Analyzed SIPOC, continuous-improvement, quality and operational datasets to identify process gaps, risks and improvement opportunities.
- Streamlined reporting with standard workflows and governance templates. Improved performance tracking, enhancing visibility and consistency.
- Coordinated cross-functional stakeholders to drive timely resolution of operational blockers and maintain execution against strategic priorities.

PeopleStrong & Chetak Enterprises

Mumbai, India

Founder's Office

03/2017 - 10/2019

- Partnered with HR, Sales and Product leadership on strategic initiatives, operational improvement and business transformation
- Increased contract execution efficiency by 5% by supporting contract preparation and stakeholder coordination
- Led to complete website transformation, improving organizational visibility, recruitment transparency and presentation of products and capabilities

Larsen & Toubro

Sharjah, United Arab Emirates

Assistant Manager / Senior Planning Engineer – Engineering Programs - Head Office, UAE

07/2012 - 12/2016

- Managed planning, resource allocation, cost control, risk management and execution governance for large-scale engineering and infrastructure programs.
- Improved project margins by approximately 2% margin gain translated to 24M INR annual savings across a 120M INR project portfolio through optimized resource planning, forecasting and proactive risk mitigation.
- Successfully coordinated and financially closed 60+ projects across India, working with multi-site engineering and business teams.
- Developed project governance mechanisms covering planning, progress monitoring, cost, risks, dependencies and execution performance.
- Built e-Library/document system centralizing engineering knowledge; improved documentation access.
- Promoted to strategic advisory role based on consistent performance in program governance and executive reporting.

EDUCATION

SV University College of Engineering

2008 - 2012

B. Tech - Electrical & Electronics Engineering - 8.2/10

Walsh College

2024 - 2026

MS - Artificial Intelligence and Machine Learning - Project on AI Trust score

Walsh College

2024 - 2027

Doctoral candidate at Walsh College, expected completion 2027. Researching on the cost of AI safety.

SKILLS

Skills:

AI Safety · Shift-Left AI Assurance AI Risk & Trust Taxonomy · Retrieval-Augmented Generation (RAG) · Large Language Models (LLMs) · Python · Claude code · Codex · GI Governance · Stakeholder Management · Mentoring & Coaching · Continuous Improvement

Standards: EU AI Act · OWASP · NIST AI Risk Management Framework (AI RMF) · Process Improvement
